INTRODUCTION

This booklet lists drug and alcohol support and treatment services in Haringey. All services are confidential and free of charge for Haringey residents.

There are several treatment and support options available. This booklet should help identify the best options for you or someone close to you. Details for each service include a short description of who the service is for, the services offered, how to access them, contact details and opening times.

A table on pages 4-5 shows the list of the main options available in each service. From page 22 onwards you can find telephone numbers for other organisations that you may find useful. Further copies of this booklet and information about other services such as Haringey Council or health services can be found at www.haringey.gov.uk and www.haringey.nhs.uk

Feedback and involvement in services

Views from service users, as well as from those who are close to them, are important to us as they help shape our services. For more information about how to get involved in helping us plan services please contact the individual agencies listed here.

Published in September 2010 by Haringey Drug and Alcohol Action Team (DAAT). The services listed on pages 4-17 are fully or partly funded by the DAAT.

OVERVIEW OF SERVICES

This table provides a quick reference to the main services and support on offer. Please refer to each agency's individual page for a full listing.

TERMS USED IN THIS DIRECTORY

Aftercare	Ongoing support after drug treatment – usually includes relapse prevention and housing, employment and training support.
Blood borne viruses	Viruses carried in the bloodstream: hepatitis B, hepatitis C and HIV. Transmitted by infected body fluids. Needle sharers are at particular risk.
Complementary (alternative) therapies	Treatments like acupuncture, reiki and massage which help with relaxing and coping with the everyday stresses more effectively.
Detox	A form of treatment where the aim is to withdraw from addictive drugs (eg. opiates) or alcohol in such a way that minimises the symptoms of withdrawal and risk of harm.
Dual diagnosis	Term used in health services to describe people with mental health problems who also misuse drugs and/or alcohol.
GP prescribing	Treatment for stable opiate users where prescribing of methadone or buprenorphine is given by a GP with support from drug treatment services.
Harm reduction	Activities and services (eg. needle exchange, overdose training) that seek to minimise the harm that drug or alcohol using behaviour causes.
Keyworking	Support which includes care planning, drug-related advice and information, interventions to reduce harm, motivational interventions, addressing social issues and offending, and relapse prevention.

Life skills	Life skills is the term used to cover a wide range of skills, from personal hygiene, shopping for food, cleaning your home to handling money.
Motivational interviewing	A client centred counselling method which helps in thinking differently about behavioural patterns and what might be gained through change.
Opiate	A category for sedative drugs (eg. heroin, opium, codeine) that depress the central nervous system. These drugs can induce analgesia, euphoria, and in higher doses, stupor, coma, respiratory depression and ultimately death.
Peer support	Support from ex drug or alcohol users.
Poly drug user	Refers to someone who uses two or more drugs (including alcohol).
Rehab	Residential treatment programmes for drug and/or alcohol users who are trying to give up use. Programmes usually last between 3 and 6 months.
Substitute prescribing	A form of treatment where the aim is not to eliminate drug use in the short term but to stabilise the use by prescribing a substitute for heroin, eg. methadone.
